Project Undertaken.

A SYSTEM TO FILTER INAPPROPRIATE MESSAGES FROM OSN USER WALLS.

- *Description :*
  One fundamental issue in today On-line Social Networks (OSNs) is to give users the ability to control the messages posted on their own private space to avoid that unwanted content is displayed. Up to now OSNs provide little support to this requirement. To fill the gap, in this paper, we propose a system allowing OSN users to have a direct control on the messages posted on their walls. This is achieved through a flexible rule-based system, that allows users to customize the filtering criteria to be applied to their walls, and a Machine Learning based soft classifier automatically labeling messages in support of content-based filtering.

➢ **Strengths**
  - Positive Attitude, Hard work.
  - Self-confidence , quick learning.
  - Ability To Acquire And Apply Knowledge Rapidly.
  - Good communication skills.
  - Hard working and Self-motivated.
  - Adaptive and Friendly nature.

AREA OFINTEREST

- Listen music , watching movies, cooking

- Learning new thing
